MarkingForge

1.5.110 · the 24 built-in dials · 3ds Max 2027

Hold the key, aim, release. **Flick**: press and move at once.
Cancel: release in the centre, Esc or right mouse button. **Far past the ring** (or a long flick): the other settings choice.
Mouse wheel while you hold the key: the next / previous page of a dial with sets ("page 2 of 3").
Real marking menus: a quick flick runs the command - the dial is not even drawn.
